N.B. Inspection Types (A,B,C) are in bold type. When the inspection has been completed, the bold type face should be removed.
Inspection Types A & B are conducted quarterly, with the exception of Type C every 21 months, as follows:

A1,B1,A2,B2,A3,B3,C,A4,B4,A5,B5,A6,B6,C

Note: 1 The reason that no operable vehicles undergo a B or higher survey in July is that it is considered too cold too overload sixty year old wiring systems by attempting to start vehicles in sub zero conditions.

Note: 2 The reason that a minimum amount of vehicles undergo any survey in December is that much of the month is given over to recreational leave.
